SURVEYOR DOCUMENTATION REQUIREMENTS PRIOR TO POUR/GUNITE

If on your plan submittal you depict the swimming pool water boundary as being within two feet of a Public Utility Easement, you will be required to provide a form survey.

This survey must be done by a Licensed Surveyor, and depict the actual placement of the forms for the pool.

This surveyor document **MUST** be downloaded directly to your pool permit on the MyPermitNow system.

If the survey is not downloaded into the system, we will not conduct an onsite pre-guniting inspection.
